

# Working with engagement scores

Engagement scores are weighted averages of student analytics that are collected within the Echo360 video platform. The weighting can be adjusted by Instructors to provide a snapshot of student engagement that is representative of their mode of instruction. The scores are therefore helpful with supporting large cohorts and particularly for early identification of struggling students.

## Important Notes

- The engagement score applies to all classes included in a Section
- Updating the engagement score will automatically change the calculated student score and class average across the course

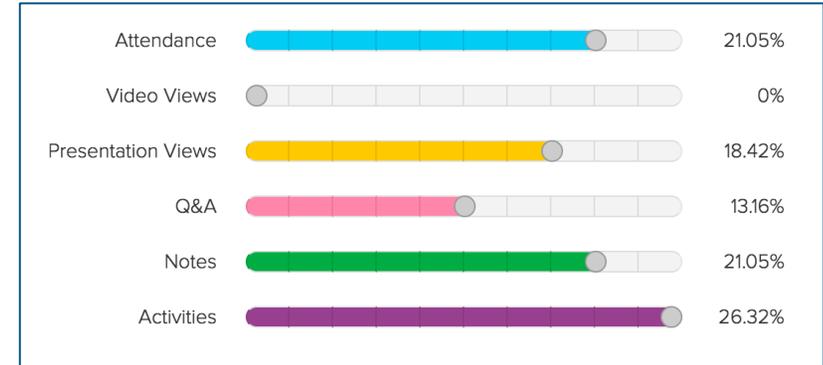

## Step 1: Using the engagement presets

1. Click the **ANALYTICS** link on the Section page;
2. Select **WEIGHTING** from the left side menu;
3. Select a preset which most suits the mode of learning for the course
4. Click **APPLY** to confirm your selection.
5. Click on one of the other presets or Reset to restore the settings to a previous preset.

The screenshot shows the 'Engagement' settings page for 'ATMS-101 - 001 Atmospheric Sciences Demo 2018'. It features a 'Weighting' section with sliders for Attendance (23.26%), Video Views (6.98%), Presentation Views (20.93%), Q&A (4.65%), Notes (20.93%), and Activities (23.26%). There are 'APPLY' and 'RESET' buttons. On the right, there are three preset buttons: 'IN CLASS LEARNING', 'REMOTE LEARNING', and 'PERSONAL AND PEER LEARNING'.

## Step 2: Manually adjusting the engagement score metrics

1. To adjust an individual engagement score metric, click on the circular slider button and drag to the left or right to adjust the % weighting;
2. Repeat for any of the other metrics;
3. Click **APPLY** to confirm your modifications and save the recalculated engagement weighted scores for the course.

## Step 3: Viewing engagement scores

1. Click on **STUDENTS** in the left side menu;
2. Filter the 'Weighted Engagement scores %' in ascending or descending order by clicking on the column heading.
