

Embedding existing Echo360 video into Canvas

Publish a capture or video to your LMS from your content Library.

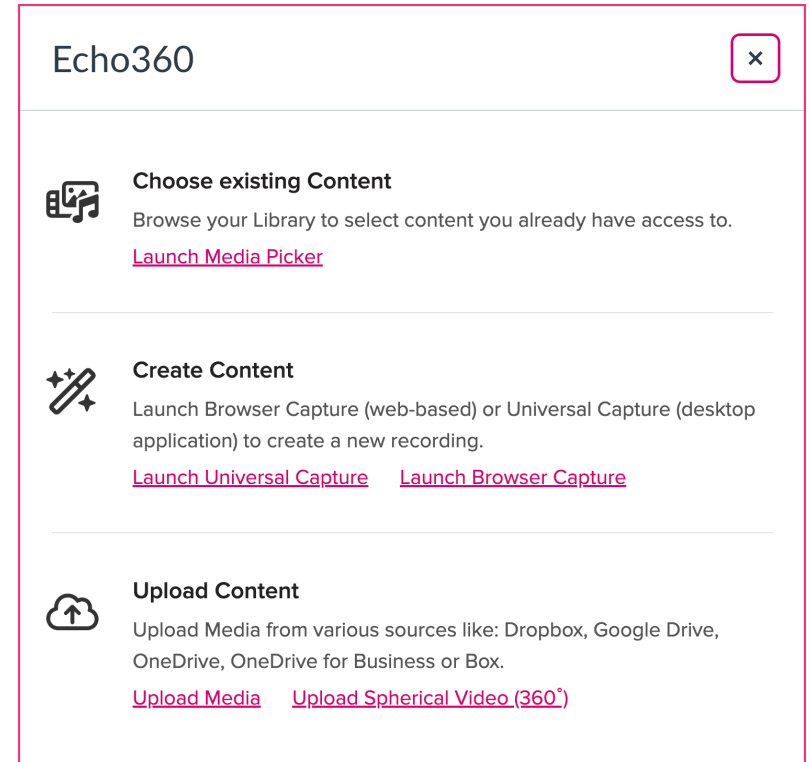

Selecting content

If a Canvas Administrator has enabled it for your institution, Echo360 provides a content embed button (also called an "easy embed button") that appears in the toolbar of all content windows. (e.g discussion, assignment, pages etc)

1. Log in to Canvas.
2. Open the course you want to post the video to.
3. Select to add one of the item types (+Page or +Assignment, etc.)
4. Click on the Echo360 easy embed icon either from the rich content editor toolbar or the plug-in menu.
5. You have the choice to **Choose existing Content** from your EchoVideo library, **Create Content** using the Universal Capture desktop software or Browser Capture, or **Upload Content** from your computer/device or a cloud location.

7. If you upload or create content, it is automatically copied to your EchoVideo library. This will allow you to re-use your content in multiple locations within Canvas, even across different courses.

Choosing display options for your video

Echo360

Embed Options

Player Style: Default

Size: 640 x 420

Start At: 00:00:00

Autoplay Automute Discussions Link

2023 Tasmania in winter.mp4
Created Jun 15, 2023 4:53 PM
Channels: Audio (0) - Video (1)

Back Embed

2. From the **Size** drop-down list, select the size you want for the embedded video. There are four size options.
3. If appropriate, enable the option to **Autoplay** the video (it will play as soon as a user opens the page you are embedding it into). You can also enable **Automute** which will mute the sound but allow the video to continue playing.
4. If appropriate, set a **Start At** time. If set, the video will begin playing at that timestamp, although viewers will be able to skip to view any segment of the embedded video.
5. When finished, click **Embed**.

A preview of the inserted video appears inside the content area

1. If your institution has created custom player styles to choose from, the Player Style drop-down list will appear. Select the style you want to be applied to the player.

Embed Options

Player Style

- Default
- Black
- Blue on White
- DY Style
- Echo360 Raspberry
- EchoExam
- Grey on Black
- Leahs style
