# Submitting an EchoVideo video to a Moodle LMS Assignment
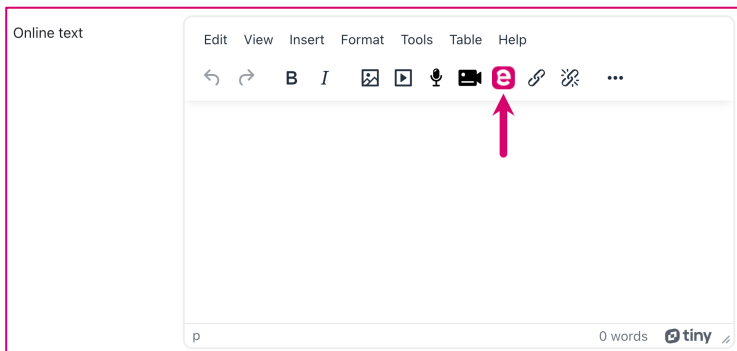

**echo360®**

Moodle Assignments can now accept EchoVideo videos. Follow these instructions to submit an EchoVideo video to a Moodle Assignment.

## Submit an EchoVideo video to the Assignment

1. Log in to Moodle as a student and navigate to your course.
2. Click on the relevant Assignment that you want to submit video for.
3. Click Add submission as shown in the below figure

4. Click on the EchoVideo Logo in the Online text submission area

5. The embed media window appears. Select either "Launch Media Picker" if the video is in your EchoVideo library or "Upload Media" if the video is on your computer or in a cloud storage location.

6. In the example here, we're selecting "Launch Media Picker" as the video we want to submit is in our EchoVideo Library. Select the video you want then select Next:

*Important: Once inserted, the selected video shows up as a link - the video itself does not display until submission (shown below)*

7. Enter any comments or other information about the video you want to provide to your instructor (**do not edit the EchoVideo link text**).

8. When finished, click Save Changes. The video is displayed.
