

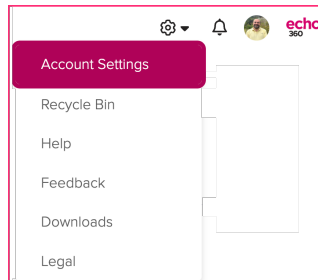

Mapping Zoom Recordings in EchoVideo

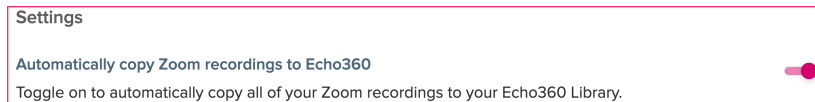

The Zoom integration feature within EchoVideo gives instructors the ability to map Zoom recordings either to their EchoVideo library or a course section.

Mapping a Zoom recording to the library or course section

1. Navigate to your EchoVideo library.
2. From the upper right area of the screen, select the cog, then Account Settings.

3. From the menu on the left-hand side, select Zoom Settings.
4. Ensure that the **Automatically copy Zoom recordings to Echo360** switch is enabled.

5. If your Zoom email address and your EchoVideo email address are different, please complete the **Alternate Zoom email** field and follow the instructions.
6. In the **Automatically create Zoom lessons in Echo360 sections** area, your list of Zoom recurring and individually scheduled meetings will appear.

Automatically create Zoom lessons in Echo360 sections

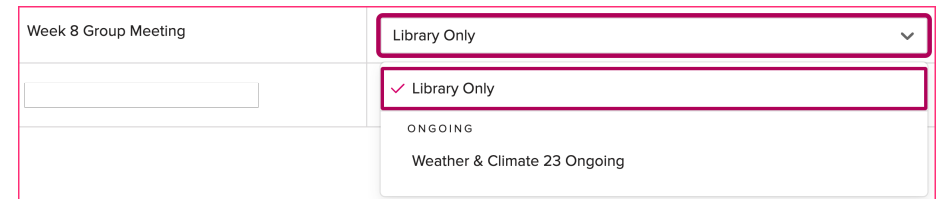

Use the Meeting List below to map your existing Zoom meetings to Echo360 course sections. Section lessons are created after each meeting has completed. Meetings are always copied to your Echo360 library.

For more information on using the Zoom mapping below, see [our online help article](#).

Zoom Meeting ID	Zoom Meeting Name	Echo360 Section
0	Personal Meeting Room	Library Only
8200147925	Week 6 Group Meeting	Weather & Climate 23 Ongoing
83480632812	Scheduled Zoom Q&A meeting	Library Only
89082391031	Week 8 Group Meeting	Library Only
89505244086	Course Section Zoom mapping	Weather & Climate 23 Ongoing

7. Next to each Zoom meeting name, choose whether you want the recording from that meeting to appear directly in the EchoVideo library or a course section.

8. Once the changes have been made, remember to **Save** the changes. You will receive a pop-up message confirming the changes have been saved.
