Using EchoVideo to Access Recorded Lectures

echo360°

Accessing Recorded Lectures

Recorded lectures are usually stored within an EchoVideo course. This would typically be accessed via the Learning Management System (or LMS). The examples below show the EchoVideo course being accessed in Canvas, Moodle, Blackboard and BrightSpace Desire2Learn.

Using EchoVideo to Access Recorded Lectures

echo360

Download Recorded Lectures

If your institution allows, you can download your lecture from the video icon in the class list. Please note, you can also download the audio only.

Changing the Quality of your Playback Environment

Time-stamped Note-Taking Functionality

During recording playback, you have access to features designed to make studying easier. In particular, the note taking feature which allows you to take time-stamped notes next to either the recording or any slides uploaded for your use by the Instructor. This will allow you to revisit particular content at a later date or when you have access to a better internet connection.

Notes, Bookmarks and Questions Create a Study Guide

All of your classes can later be accessed through the student study guide. This will allow you to play back pieces you have bookmarked or written notes against and provide opportunities for assessment review. These notes can also be downloaded if you wish to use them with another tool.
